

Eligibility Criteria for early disposal incentive (for devices disposed at designated disposal points from 23 September to 31 December 2019 inclusive)

To encourage owners of non-UL2272 e-scooters to dispose their devices early, those with registered e-scooters may qualify for a **time-limited \$100 early disposal incentive per e-scooter** if the devices are disposed at the designated disposal points **from 23 September to 31 December 2019**. Please note that the early disposal incentive scheme has ended on 31 December 2019. However, e-scooter owners can continue to dispose their devices at no cost at the designated disposal points until 31 March 2020.

To be eligible¹ for the early disposal incentive, the registered e-scooter must fulfil all of these conditions:

- be registered with LTA;
- be affixed with both the Registration Mark and Identification Mark;
- the Registration Mark affixed on the e-scooter is not tampered with or otherwise display the word “void” on the Registration Mark. If the Registration Mark is damaged due to wear and tear, at least one legible character on the Registration Mark must match the corresponding character on the Identification Mark; and
- be disposed of at [any of these designated disposal points \(PDF, 223kb\)](#) by 31 December 2019.

E-scooter owners are also advised to dispose of devices that are fully intact, and not dismantled in any way (e.g. device is missing certain parts). LTA reserves the right to refuse the incentive if the device is not intact.

The applicant must also:

- be the registered owner recorded in LTA’s register of e-scooters; and
- maintain a valid bank account number in Singapore for crediting the early disposal incentive

¹LTA reserves the sole right and discretion to decide on the eligibility of any applicant and registered e-scooter for the early disposal incentive
