

## List of Approved Power-Assisted Bicycle (PAB) Models (as at 3 March 2020)

1. LTA does not endorse either the PAB models or their retailers in this list. Consumers should make their own assessment based on their needs before purchasing the PABs from the retailers.
2. To meet LTA's technical requirements, retailers have worked with PAB manufacturers to produce the PABs without a start-up assistance feature.
3. The approval granted for PAB models is both retailer and model specific, and non-transferable. New applicants who wish to import identical PAB models in the list will be required to undergo fresh approval and sealing.
4. Consumers should only purchase PABs that are affixed with an orange seal bearing LTA's logo and a serialised number, as these PABs have been assessed to comply with LTA's technical requirements at the point of sealing.
5. Consumers should only purchase and use original power adapters or chargers (supplied by the PAB manufacturer) that display an [ESG SAFETY Mark with a valid serial number](#).
6. For more information on PAB requirements, click [here](#).
