

## **LTA Call for Solutions – Review of Economic Parameters Study and Implementation of Innovative Strategies for Conducting Longitudinal Analysis**

### **Responses to CFS Queries**

1. Are there any restriction on foreign researchers based overseas being part of the research team?

Foreign researchers based overseas are welcome to be part of the study team. However, with reference to Section 3, Paragraph 4d of the Call for Solutions document, do note that key team members must be committed to be based in Singapore for key milestone discussions. Any data collected or provided by Authority should reside in Singapore only. Please refer to Section 7 – Guidelines for Participation of the Call for Solutions document, should you wish to register and participate as a consortium.

2. Given the diverse range of skills and expertise required for this project, are there potential collaborators or consortium partners that LTA could recommend?

Please refer to Section 7 – Guidelines for Participation of the Call for Solutions document, should you wish to register and participate as a consortium.

You may wish to explore suitable collaborations through your own professional networks and industry connections to achieve the requirements of this Call for Solutions.
