What is the Bus Service Enhancement Programme (BSEP)?

Starting from 2012, the Government has partnered the bus operators to significantly increase bus capacity and enhance bus service levels to benefit commuters. With the expansion of BSEP, a total of 80 new bus services will be introduced, and a second batch of 450 buses will be added, bringing the total to 1,000 new Government-funded buses, or an increase in 25% of the total bus fleet. All BSEP improvements under the first phase will be rolled out by end 2014 while the majority of the remaining improvements will be implemented by 2016.
