

Bringing You More Buses, Better Rides

New Bus Services and Enhancements

The map shows the enhancements to existing bus services from July to September 2014. These enhancements involve adding more buses to reduce crowding and improve bus frequencies of existing services during peak hours. In addition, five new bus services will be launched in the coming months.

What is the Bus Service Enhancement Programme (BSEP)?

Starting from 2012, the Government has partnered the bus operators to significantly increase bus capacity and enhance bus service levels to benefit commuters. Under the BSEP, about 80 new services will be introduced and 1000 buses will be added to the existing bus fleet.
