

**ENABLING SONY SG50 SMARTBAND FOR TRANSIT & RETAIL MOBILE PAYMENT**

To enable mobile payments, trial participants will need to download the latest version of the Singtel mWallet app from Google Play™ on their Android phone. If the app is already installed on their Android phone, they will have to update it with the latest version.

Once the app is installed, trial participants can enable the phone for the SG50 SmartBand. This is done by logging into the Singtel mWallet app, and selecting the “Cards” section and then the “SmartBand” tab. Commuters will be guided through steps to download an accessory app which is required for Bluetooth connectivity between their Android phone and the band.

When both the Singtel mWallet and accessory apps are installed on the Android phone, participants will be able to connect it to their SG50 SmartBand with their Android phone via Bluetooth. This step is completed by opening Singtel mWallet’s Cards, SmartBand tab and then tapping on “Pair SmartBand”.
