ANNEX C

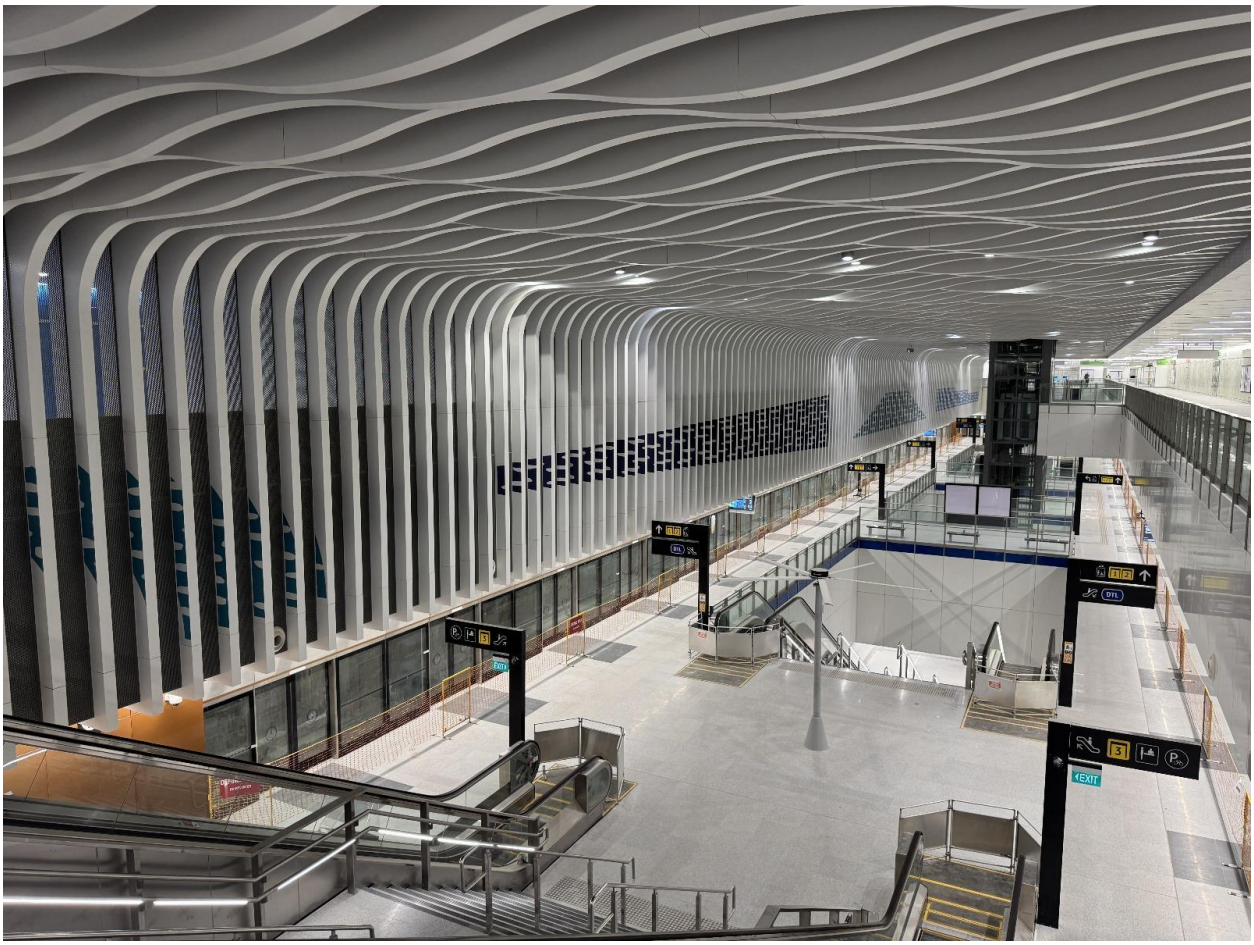

About TEL5 and DTL3e stations

TE30 Bedok South station

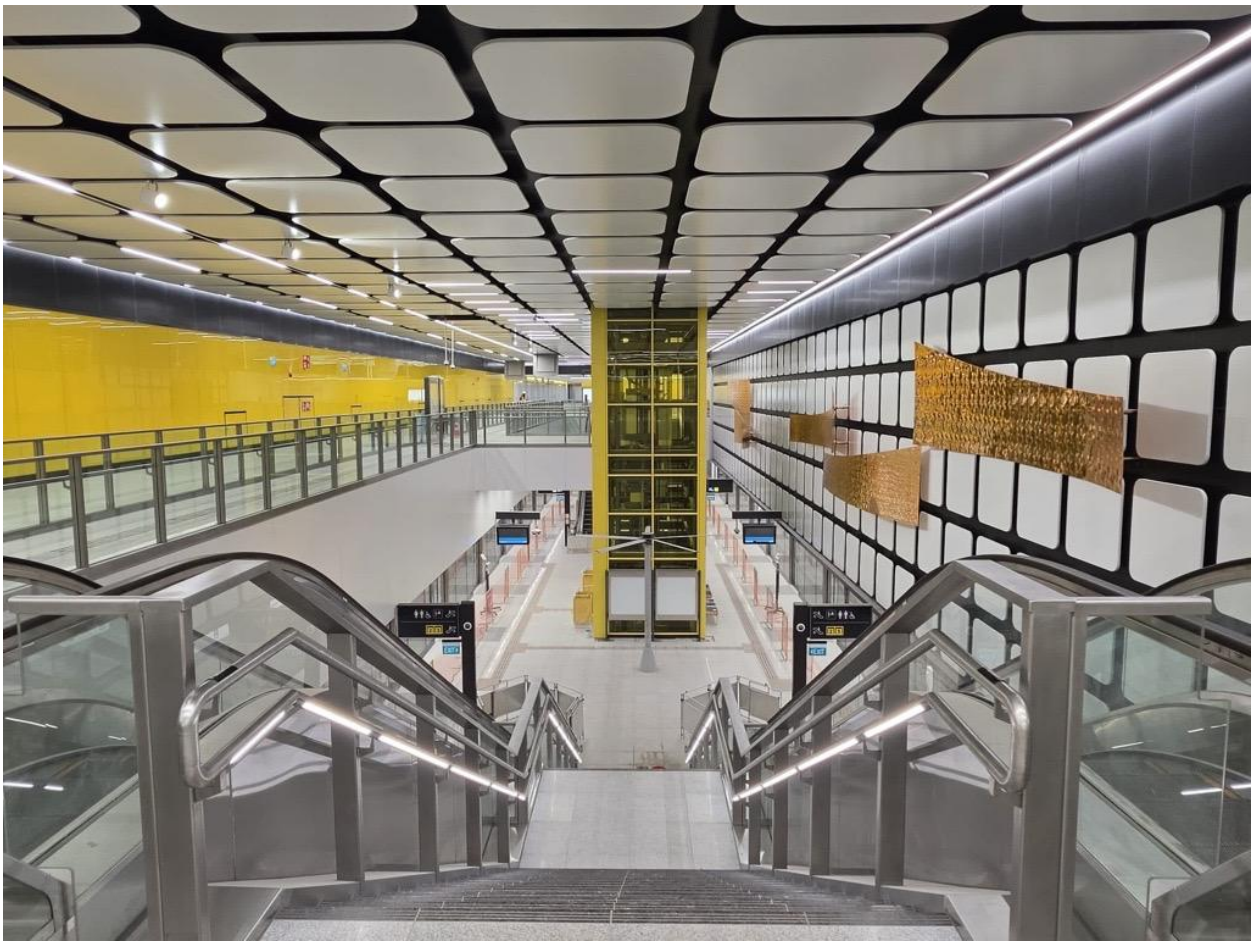

TE30 Bedok South Station is one of the two stations under Thomson-East Coast Line Stage 5 (TEL5), located along Upper East Coast Road near the Bedok South residential area. The station will improve rail connectivity for residents and schools in the vicinity, including the Bayshore precinct, and is expected to integrate with future developments in the area.

TE31/DT37 Sungei Bedok interchange station

TE31/DT37 Sungei Bedok Station is an underground interchange connecting the Thomson-East Coast Line and Downtown Line, making it the second TEL-DTL interchange after Stevens. As the eastern terminus of both lines upon opening, the station will provide commuters with seamless transfers and greater connectivity across the rail network. Located near Upper East Coast Road and Bedok Road, it will also feature underground bicycle parking facilities

DT36 Xilin station

DT36 Xilin Station is a new underground station on the Downtown Line 3 Extension (DTL3e), situated beneath the junction of Xilin Avenue and Changi South Avenue 3. The station will enhance access to the Changi South industrial estate, Changi Business Park, and surrounding employment nodes, while providing more direct rail connections between eastern Singapore and the city centre. Together with Sungei Bedok Station, Xilin forms the two-station DTL3e extension which will create additional travel options for commuters in the east.
