# Guidelines for Placing Skips on Public Streets

Land Transport  Authority

Skips are commonly used in building construction activities to store and transport construction debris. They should be placed within work sites. However, where space is a constraint, skips may be allowed on public streets for loading purposes only.

Owners and users are advised to plan the removal of construction debris to minimise the duration of skips on public streets. They shall comply with the prevailing requirements/guidelines as stipulated by the other agencies for placing skips on public streets.

## DO's

Place skip on roadside parking lots where available by seeking relevant approval from HDB or URA before use.

Without parking restrictions:

- Leave at least 3.5m width from where the skip is placed to facilitate safe movements of vehicles.
- Deploy workmen\* to guide road users if it is lesser than 3.5m width from where the skip is placed.

The door/opening of skip must always be closed when not in use.

Skip shall:

- Bear the company name and contact number on both sides of skip.
- Be painted with light/bright colours and marked with the correct type of retroreflective sheeting.

## DON'Ts

Skip shall not be placed at:

- Expressways
- Major roads
- Public walkways
- Near traffic junctions
- Road bends

With parking restrictions:

- Skip shall not be left unattended. Workmen\* are to be deployed to guide road users.

The door/opening of skip shall not face oncoming traffic.

Skip shall not alter/affect the public street structure or road-related facility.

\*The workmen must wear proper safety vests and be equipped with the correct traffic control devices to guide road users.
