# WE'VE GOT YOU COVERED!

No matter rain or shine, commuters can walk comfortably from bus stops, train and bus stations to their homes, offices or schools, as more covered walkways will be completed by 2018.

By this year, there will be more than 200km of sheltered walkway from public transport networks – 4 times longer than 2014. It is also longer than the circumference of Singapore island, which is about 193km.

Thanks to the Walk2Ride programme, which started in 2014, commuters can enjoy sheltered and comfortable connectivity to offices, schools and homes within a 400m radius of MRT stations and within a 200m radius of LRT stations.

Soon, you can get to your destination from the train station or bus stop in cool and dry comfort!
