

Public Consultation on the
**LAND TRANSPORT
MASTER PLAN**

2040

Land Transport Authority
We Keep Your World *Moving*

We would like to hear from you
on how we can shape the future
of land transport together.

How might we make

**WALK
CYCLE
RIDE**

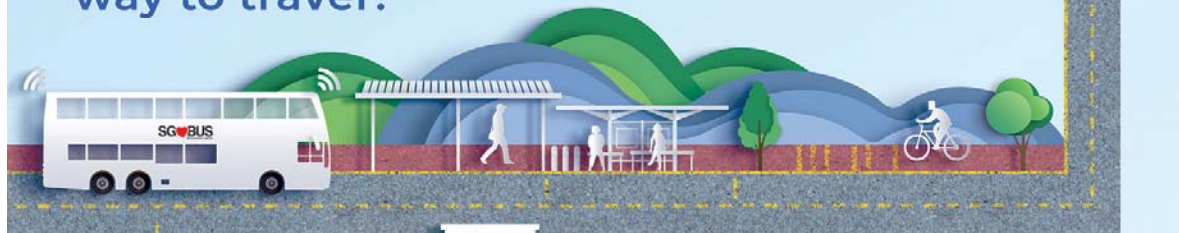

your preferred
way to travel?

We have identified these possible approaches
to make your Walk Cycle Ride journeys faster:

Bring jobs and amenities closer to homes
Reduce travel times by bringing jobs and
amenities closer to homes

**Give greater priority to Walk Cycle Ride
through road redesign**
Change the design of our roads and paths to create
more space for mass public transport and active mobility

Provide and facilitate more direct travel
Expand the rail network and facilitate more innovative,
technology-enabled transport options

We Keep Your World Moving

We would like to hear from you
on how we can shape the future
of land transport together.

How might we make
**WALK
CYCLE
RIDE**
easier
and more **INCLUSIVE
FOR ALL?**

We have identified these possible approaches
to make Walk Cycle Ride more inclusive:

**Provide inclusive and easily
accessible infrastructure**

Continue to improve the inclusivity and accessibility
of transport infrastructure to meet the increasingly
diverse mobility needs of all Singaporeans

**Partner the community to
foster shared responsibility**

Develop a caring commuting culture
with the community to foster positive
social norms and promote inclusivity

Land Transport Authority
We Keep Your World *Moving*

We would like to hear from you
on how we can shape the future
of land transport together.

We have identified these possible approaches to improve our quality of life through land transport:

Create and reclaim more spaces for the community

Develop more areas that are safer as well as more walkable and pleasant for everyone

Build a safer environment, towards zero land transport-related deaths

Use education, engineering and enforcement to create a safer and more pleasant environment for everyone

Use cleaner, quieter vehicles and greener construction techniques

Green our vehicle fleet and explore more innovative construction techniques and materials

How might we improve the
QUALITY OF LIVING

for all Singaporeans through our land transport system?
